Professional Summary

Full Stack Developer with hands-on experience in building web applications using TypeScript, Python, Next.js, Django and scalable backend architectures like Elysia. Google Cybersecurity certified professional skilled in REST API development, containerization, and cloud technologies. Developed multiple full-stack applications with features including role-based access control and financial algorithms. Seeking to leverage technical skills in JavaScript, Python, and cloud solutions to deliver scalable applications.

Experience

Inflancer Technology May. 2025 – Present
Backend Developer *Gwarko*

- Created scalable backends using Bun.js and Elysia
- Containerized applications with Docker, caching, rate limiting, etc.
- Worked on multiple projects including a Multi-tenant Saas and Hotel Booking Platform.
- **Technologies:** Bun.js (Node.js), DRF, TypeScript, DrizzleORM, Redis, Digital Ocean S3, Docker, PostgreSQL

Cloco Nepal Inc. Feb. 2025 – Apr. 2025
Full Stack Developer Intern

- Created full-stack features using Next.js (frontend) and Django (backend)
- Containerized applications with Docker, reducing deployment time by 30%
- Executed JWT authentication and role-based access control
- **Technologies:** React, Zustand, TanStack Query, PostgreSQL

AMNIL Technologies Dec. 2024 – Jan. 2025
Backend Developer Intern

- Built RESTful APIs with Node.js
- Created API documentation using Swagger UI, improving team productivity
- Contributed to an analytical dashboard development with real-time data processing
- **Technologies:** React, Node.js, Swagger UI, Express, MongoDB

CloudFactory Nov. 2022 – Dec. 2024
Cloudworker

- Processed and analyzed datasets for AI training with high accuracy
- Collaborated with remote teams

Projects

Bookezzy | *Elysia, Bun, Next.js* 2025

- SaaS based hotel booking platform that accommodates both hotels and customers
- Fully developed RBAC based backend with Elysia, Bun.js and DrizzleORM with Postgres
- Deployed in a Docker container on a VPS alongside simple Git Actions based CI/CD
- **URL:** bookezzy.com

Shramx | *Next.js, Elysia, Bun* 2025

- Multi-tenant SaaS platform built for manpower agencies
- Developed full-stack features across frontend and backend using Next.js, Elysia and Bun
- **URL:** shramx.app

Artist Management System | *Next.js, Django, Docker, TanStack Query* Jan. 2025

- Applied role-based dashboards for 3 user types (artists, managers, admins)
- Implemented JWT authentication with token blacklisting for enhanced security
- **GitHub:** artist-management-backend

Education

Tribhuvan University 2020 – 2025
Bachelor of Computer Application *Grade: 3.66*

- **Relevant Coursework:** Algorithms, Database Systems, Web Security

Technical Skills

Programming: JavaScript, Python, TypeScript
Frontend: React, Next.js, Tailwind, Zustand, Redux
Backend: Node.js, Bun.js, Elysia, Django, Django REST Framework, Laravel
Data & Big Data: PostgreSQL, MongoDB, MySQL, DrizzleORM, Redis
DevOps: Docker, Git, CI/CD, Nginx, Git Actions
Cloud: AWS (EC2, S3), Digital Ocean
Cybersecurity: Threat Analysis, Network Security
Tools: Swagger, Figma, PowerBI, Postman, n8n, TanStack Query (React Query)

Certifications

Google Cybersecurity Professional Certificate — Coursera — December 2024
Google AI Essentials — Coursera — October 2024
Full Stack Development (MERN) — Mindrisers Institute — July 2024
